SUMMARY

Aspiring Software Engineer and Full Stack Developer with hands-on experience building scalable web, mobile, and cloud-integrated applications using React.js, React Native, Node.js, Spring Boot, MongoDB, and MySQL. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and DBMS, with experience in API integration, AWS deployment, and production-ready application development focused on performance and user experience.

EDUCATION

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science Engineering; CGPA: 8.64/10.0

Tamil Nadu, India

Expected Aug 2028

TECHNICAL SKILLS

Languages: Java, C, C++, Python, JavaScript

Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, REST APIs

Databases: MongoDB, MySQL

Cloud / DevOps: AWS EC2, Docker, Nginx

Mobile: React Native, Android App Development, APK Deployment

Tools: Git, GitHub, Postman, VS Code, MATLAB, Arduino IDE

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

ISOEH

Software Developer Intern

India

May 2026 – Jun 2026

- Developed and enhanced full-stack web and mobile application features using React.js, React Native, and Node.js
- Integrated REST APIs and optimized frontend-backend communication to improve responsiveness and user experience
- Assisted in deploying applications on AWS EC2 with server configuration using Nginx, ensuring stable production uptime

PROJECTS

IntelliMail AI – Smart Email Assistant | React.js, Node.js, NLP

- Built an AI-powered email assistant using NLP to generate context-aware email responses in real time
- Improved productivity by reducing email drafting time by up to 40% using intelligent suggestions

Exam Alchemy – Automated Question Paper Generator | Spring Boot, MongoDB

- Developed a full-stack system for automated question paper generation using Spring Boot and MongoDB
- Designed REST APIs for filtering questions based on topic, difficulty, and Bloom's taxonomy

Weather Sphere | React, React Native, REST APIs

- Built a cross-platform weather application deployed as both a responsive web app and Android APK
- Integrated geolocation and weather APIs to provide real-time weather updates and forecasts
- Optimized API handling and UI rendering for smooth performance across devices

Smart Campus Parking Management System | MySQL, SQL

- Designed a normalized MySQL schema for automated parking slot allocation and management
- Implemented SQL queries, joins, and triggers for booking and penalty automation

Obstacle Detector using Ultrasonic Sensor | Arduino, HC-SR04

- Built a real-time obstacle detection system using Arduino and ultrasonic sensors
- Implemented LED and buzzer-based alerts for proximity detection

CERTIFICATIONS & ACHIEVEMENTS

- Certified in Java, Object-Oriented Programming, and DBMS (NPTEL)
- Participant, Smart India Hackathon (SIH) 2025
- Event Organizer, Coding Ninjas 10X SRM Club – coordinated technical events for 100+ participants
